Instructions for preparing the assignment

Spring semester of academic year 2022-2023

1. Subject of the work

You will need to design and develop a CRUD type business application, with three (3) levels (front-end, business logic, relational database) on a small scale. The term "small scale" we mean that it is not necessary to deal with all the possible functions that you will describe requirements but choose 3-4 of those that are important, in your opinion, and these should be convert it into code. Besides, the goal of the work is not only the software that will be produced but also the development methodology.

2. Selection of topics, development methodology & deliverables

The assignment is individual. It is selected from the topics listed in the Appendix based on the last digit of your registration number. The development methodology follows the model of waterfall. Regarding the code, it is preferable to deliver a desktop application in Java Swing, but this is not mandatory, you can choose the software stack of your choice.

Deliverables:

- (1) Use case diagrams (until 19/5)
- (2) Software Requirements Specification (9/6)
- (3) Robustness diagrams (23/7)
- (4) Code (31/8)
- (5) User Acceptance Testing document (31/8)
- (6) User Acceptance Testing results (31/8)

Regarding (2), (5) & (6) you will be given relevant templates in Greek.

UML diagrams can be made with the tool of your choice and integrated into related Word file as images (snippets).

3. Database

You can choose whichever relational database you prefer. Examples include: _____

• Ms Sql Server Express

• Ms Sql Server EnterpriseError! Bookmark not defined.

• Oracle

• PostgreSQL

• MariaDB

• MySQL

4. Rating

Deliverable	Units 2.5
Use case diagrams	
Software Requirements Specification	2.5
Robustness diagrams	1
Code	1.5
User Acceptance Testing document	1.5
User Acceptance Testing results	1

Annex

0. Online Food Order (Delivery)
1. Car Wash Appointment Management
2. E-shop for sports goods
3. Hotel reservation management
4. Banking application (ATM type)
5. Manage movie ticket reservations
6. Car rental platform
7. Barbershop/hair salon appointment management
8. Lending library
9. E-shop for pet food
